

## **Express Manufacturing, Inc. Selects Valor's Solutions for Mid-Tier Contract Manufacturers to Deliver World Class End to End Manufacturing Solutions**

*Santa Ana and Foothill Ranch, CA and Yavne, Israel - September 15, 2005, Valor Computerized Systems [FSE: VCR, VACS], the leader in productivity-enhancing solutions for the electronics industry, announced today that it has reached an agreement with Express Manufacturing, Inc. regarding the implementation of Valor's Trilogy 5000 software.*

“Valor’s Trilogy 5000 solution will enable us to significantly reduce engineering time through an automated front to back engineering solution” stated Thomas Ng, Engineering Manager. Express Manufacturing, Inc., the largest privately held contract manufacturer in Orange County, California, is growing rapidly by providing engineering services from new product introduction stage to volume manufacturing of products.

The solution selected by Express Manufacturing, Inc. after thorough benchmarks, covers the full PCB assembly process preparation dataflow, including intelligent CAD data input, Bill of Materials (BOM) and Approved Vendor List (AVL) validation and automated Design for Manufacturing (DFM) verification.

“With Trilogy 5000, we are able to provide improved engineering and manufacturing services to our customers, allowing them to realize numerous competitive advantages provided by outsourcing” added CP Chin, President of Express Manufacturing, Inc.

“Express Manufacturing, Inc.’s decision in selecting the Trilogy 5000 solution reflects our success in meeting the business challenges of the rapidly-growing Mid-Tier contract manufacturing market” said Chuck Feingold, President of Valor Computerized Systems, Inc., and continued - “our toolset allows contract manufacturers to utilize their significant expertise in the manufacturing process to deliver a higher quality product to their customers and ultimately to end users.”

About Express Manufacturing, Inc.

Express Manufacturing, Inc. (EMI) provides world-class electronics manufacturing services to OEMs and electronics companies representing a variety of industries. For over two decades, the ISO-9001:2000 contract manufacturer has helped customers realize the numerous competitive advantages of outsourcing their manufacturing for rapid response, high-mix, low-to-moderate volume PCB assembly. From quick turn to high volume, EMI enhances customers’ market position with end-to-end manufacturing solutions. EMI’s complete service offerings, proven expertise, and continued investments in new facilities and technologies ensure a winning experience from start to finish. The company is headquartered in Santa Ana, California U.S.A.

## About Valor

Valor Computerized Systems develops compelling technologies for simulating and optimizing the manufacture of printed circuit boards. Valor's breakthrough technologies for product design analysis, simulation and optimization of PCB assembly, and Manufacturing Operations Management increase productivity, yield and quality, and help streamline and accelerate product innovation in a fast-paced global market. Valor is listed on the Prime Standard of the Frankfurt Stock Exchange [WKN 928731]. More information on Valor can be found on [www.valor.com](http://www.valor.com)
